3. Have an open mind :)

Frequently asked questions

Question: What are the key takeaways from the session 'Systematic product modelling'?

Answer:

- Confidence and approach to modelling any complex or interconnected systems
- Learn different approaches to test to gain stakeholder confidence
- A structured way to understand any product in depth leads to higher chances of test coverage

Question: Where can I apply 'Systematic Product modelling' in my testing job?

Answer:

1. Defining Test strategy for product
2. Starting on a new project
3. Reviewing Test Strategy and Coverage for existing testing approaches

Question: Should I read something before I could attend this session?

Answer: <https://www.satisfice.com/download/heuristic-test-strategy-model>

<https://www.linkedin.com/feed/update/urn:li:activity:6680109478744088576/>

Question: Who can attend this session?

Answer: We have seen this session most beneficial to those who are facing the following issues:

- Too much to test, too less time
- Not sure if the testing coverage is robust
- Taking too much time to learn the product
- Bored with test cases and not finding new issues

Question: Will we have hands-on exercise done during the session?

Answer: There will be 25% theory and 75% walkthrough of exercises and past case studies, applying the lessons from this workshop.

Question: Can I attend this workshop on my mobile?

Answer: If you want to try out some of the activities along with the instructors, do join in from your laptop. If you want to be a passive listener, mobile is also fine. As we will be working on multiple screens at the same time, the mobile screen might be too small for easy viewing.
